Differentiable image parameterizations invite us to ask "what kind of image generation process can we backpropagate through?" The answer is quite a lot, and some of the more exotic possibilities can create a wide range of interesting effects, including 3D neural art, images with transparency, and aligned interpolation.

Thanks a lot to @aerinykim, @suzatweet and @hardmaru for the useful feedback!. The academic Deep Learning research community has largely stayed away from the financial markets. Maybe that's because the finance industry has a bad reputation, the problem doesn't seem interesting from a research perspective, or because data is difficult and expensive to obtain.

Introduction to Learning to Trade with Reinforcement Learning

First, in general, reinforcement learning turned out to be a lot trickier than expected. A big part of it is that right now, reinforcement learning is really sensitive. There are a lot of details to get just right, and if you don't get them right, it can be difficult to diagnose where you've gone wrong.. Example 1: after finishing the basic implementation, training runs just weren't ...

Property, in the abstract, is what belongs to or with something, whether as an attribute or as a component of said thing. In the context of this article, it is one or more components (rather than attributes), whether physical or incorporeal, of a person's estate; or so belonging to, as in being owned by, a person or jointly a group of people or a legal entity like a corporation or even a society.
