A race is a grouping of humans based on shared physical or social qualities into categories generally viewed as distinct by society. First used to refer to speakers of a common language and then to denote national affiliations, by the 17th century the term race began to refer to physical (phenotypical) traits. Modern scholarship regards race as a social construct, an identity which is assigned ...

Race (human categorization) - Wikipedia

Heredity is the passing on of traits from parents to their offspring, either through asexual reproduction or sexual reproduction, the offspring cells or organisms acquire the genetic information of their parents. Through heredity, variations between individuals can accumulate and cause species to evolve by natural selection. The study of heredity in biology is genetics

Heredity - Wikipedia

Atlas of Genetics in Oncology and Haematology (INIST-CNRS, Nancy, Fr) . Entrez_Gene (NCBI, Bethesda, Us) Entrez_Gene is a part of Entrez devoted to search informations on genes and links to other database as RefSeq, maps, OMIM, Unigene, Pubmed....

Number: 0028. Policy. Notes: Some Aetna HMO plans exclude coverage for treatment of temporomandibular disorders (TMD) and temporomandibular joint (TMJ) dysfunction, and may also exclude coverage for other services described in this bulletin (e.g., non-surgical management) The plan determines the scope of coverage. Please check benefit plan descriptions for details.

Temporomandibular Disorders - Medical Clinical Policy ...

Perhaps it is harmless, in everyday thinking, to equate the brain with "gray matter." But if you want to know how brain changes affect behavior, or what causes brain disorders from Alzheimer's disease to multiple sclerosis, focusing on only part of the brain is risky. Until recently, neuroscience has given short shrift to the half of the brain that is not gray but white matter.

"Francis Crick and I made the discovery of the century, that was pretty clear. We made it, and I guess time has justified people paying all this respect to me in spite of my bad manners." James Watson was only 25 years old when he and his older colleague, Francis Crick, discovered the structure of deoxyribonucleic acid (DNA) the building block of all life on Earth.

James D. Watson, Ph.D. | Academy of Achievement

The NIH Common Fund was enacted into law by Congress through the 2006 NIH Reform Act to support cross-cutting, trans-NIH programs that require participation by at least two NIH Institutes or Centers (ICs) or would otherwise benefit from strategic planning and coordination. The requirements for the Common Fund encourage collaboration across the ICs while providing the NIH with flexibility to ...
