Cathy Kessel has been working hard to incorporate the feedback from this blog and from other places into final versions of the progressions. Here is the close to final version of the progressions up through Ratios and Proportional Relationships. Major edits include an expanded preface, a comprehensive introduction, and some significant additions to the fractions progression.

Hirschsprung disease, also known as megacolon, is a congenital condition that causes blockage of the intestine. The blockage is caused by a lack of nerves in the bottom segment of the colon. Children with Hirschsprung disease will need surgery to remove the non-functional segment of the intestine.

Hirschsprung Disease (HD): Symptoms, Diagnosis and ...

1. A bisector line means that this line cuts the chord in 2 EQUAL PARTS. 2. Anytime you are dealing with a chord, you can draw a line from the center of the circle TO the center of the chord. This line is the bisector line. 3. Be careful! Because this "bisector" comes from the center but it stops at the CHORD (does not go all the way to the outside of the circle), this line is NOT A RADIUS.
