A prime number (or a prime) is a natural number greater than 1 that cannot be formed by multiplying two smaller natural numbers. A natural number greater than 1 that is not prime is called a composite number. For example, 5 is prime because the only ways of writing it as a product, 1×5 or 5×1 , involve 5 itself. However, 6 is composite because it is the product of two numbers (2×3) that ...

Durkheim's Two Problems. Durkheim's primary purpose in *The Elementary Forms* was to describe and explain the most primitive religion known to man. But if his interests thus bore some external similarity to those of the ethnographer or historian, his ultimate purpose went well beyond the reconstruction of an archaic culture for its own sake; on the contrary, as in *The Division of Labor* and ...

where the s are integers (or equivalently, rational numbers) and satisfies no similar equation of degree n , then α is said to be an algebraic number of degree n . A number that is not algebraic is said to be transcendental. If α is an algebraic number and $\alpha \in \mathbb{Z}$, then it is called an algebraic integer. In general, algebraic numbers are complex, but they may also be real.

The simplest class of one-dimensional cellular automata. Elementary cellular automata have two possible values for each cell (0 or 1), and rules that depend only on nearest neighbor values. As a result, the evolution of an elementary cellular automaton can completely be described by a table specifying the state a given cell will have in the next generation based on the value of the cell to its

Fundamental questions. The etymological origins of the term democracy hint at a number of urgent problems that go far beyond semantic issues. If a government of or by the people—a “popular” government—is to be established, at least five fundamental questions must be confronted at the outset, and two more are almost certain to be posed if the democracy continues to exist for long.

Introduction. When Creationists object to Darwinian evolution, they have mainly two things in mind: (1) the widespread message that scientific thought and explanations as informed by evolutionary theory make God irrelevant to the origin of Creation and the development of life on Earth, and (2) the claim that evolutionary theory and Scripture are not in conflict.
