What is PhET? Founded in 2002 by Nobel Laureate Carl Wieman, the PhET Interactive Simulations project at the University of Colorado Boulder creates free interactive math and science simulations.

PhET: Free online physics, chemistry, biology, earth ...

Exploring the latest in scientific discoveries from prehistoric life to missions to Mars.

Science & Innovation - National Geographic

Earth is the dynamic planet that we call home. It formed over 4.5 billion years ago, and it has been changing ever since. Sometimes these changes happen very fast, like an earthquake or a volcanic eruption.

Earth Science for Kids: OLogy | AMNH

Researchers who study the Earth's climate create models to test their assumptions about the causes and trajectory of global warming. Around the world there are 28 or so research groups in more ...

What's Really Warming the World? Climate deniers blame ...

Add different salts to water, then watch them dissolve and achieve a dynamic equilibrium with solid precipitate. Compare the number of ions in solution for highly soluble NaCl to other slightly soluble salts. Relate the charges on ions to the number of ions in the formula of a salt. Calculate K_{sp} values.

Salts & Solubility - Solubility | Salt | Solutions - PhET ...

The virtual labs are fully interactive simulations in which students perform experiments, collect data, and answer questions to assess their understanding.

Download more than 10,000 maps for PowerPoint & make them interactive with BeGraphic. To promote the coming version Pro, BeGraphic offers for free 4 key functions, including the largest range of maps for PowerPoint in its "version Lite".

Interactive Maps (FREE): clickable maps for PowerPoint ...

Google Earth is the dynamic tool that will be used to accomplish these tasks. Google Earth provides incredible views of our world in an interactive 3D environment. Beyond the visual appeal, users can add placemarks, annotations, photos, images, and models to the earth's surface, as well as measure distances and draw paths.

On-Line Earth Science Regents Review Flashcards Index

Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

Locate TV transmitters, choose antennas, look at coverage maps, and optimize your HDTV setup. Learn about digital TV and how to incorporate it into your home theater system. Rediscover over the air (OTA) TV. Looking for something more accurate than antennaweb?, TV Transmitters in Google Earth Format, Transmitter Coverage Maps in Google Earth Format, Maps of TV channels near you.

TV Fool

A planet is an astronomical body orbiting a star or stellar remnant that is massive enough to be rounded by its own gravity, is not massive enough to cause thermonuclear fusion, and has cleared its neighbouring region of planetesimals.. The term planet is ancient, with ties to history, astrology, science, mythology, and religion. Five planets in the Solar System are visible to the naked eye.

Planet - Wikipedia

I believe that active learning is the key to happy, motivated, and challenged students. I use a lot of technology in my classroom because it engages my students and helps me run my classroom efficiently, but I believe there is a time and a place for technology and more is not always better.
