Honors Chemistry is designed for students who have demonstrated strong ability in previous science courses. In this fast-paced, demanding course, the main topics--which include atomic theory, nuclear chemistry, periodicity, chemical reactions, stoichiometry, gases, solutions, reaction kinetics, equilibrium, acid-base theory, oxidation-reduction, and organic chemistry--are studied at an ...

Label-free, real-time cell analysis in a 96-well format. The xCELLigence® RTCA SP instrument uses noninvasive electrical impedance monitoring to quantify cell proliferation, morphology change, and attachment quality in a label-free, real-time manner. The SP (single plate) model differs from our other xCELLigence® instruments in that it uses a 96-well electronic microtiter plate (E-Plate ...

Class Notes for Environmental Geochemistry. To do this problem you simply calculate the activity of  $Al^{3+}$  in equilibrium with gibbsite at each pH value and then use the equilibrium reactions linking  $Al(OH)_3$  with  $Al^{3+}$  to calculate the activities of each  $Al(OH)_3$  species. The sum of all the molalities of all these Al species would be the solubility of gibbsite at each pH point.

CDI is characterized by the facile removal of charged ionic species from aqueous solutions via electrostatic or electrochemical interactions. A conventional CDI cell consists of two graphite current collectors facilitating electron transfer, two porous carbon electrodes for capacitive (i.e., non-Faradaic) ion sorption and a spacer channel enabling the feed water to be transported (see Fig. 2a ...

In the first article of this series, we discussed the problems humans have converting omega-3 (n-3) fats from plant sources, such as flax seeds and walnuts, to the longer chain derivatives EPA and DHA. In the second article, we discussed how excess omega-6 (n-6) in the diet can block absorption of omega-3, and showed that the modern, Western diet contains between 10 and 25 times the optimal ...

**INTRODUCTION** — Psoriasis is a common chronic skin disorder typically characterized by erythematous papules and plaques with a silver scale, although other presentations occur. Most cases are not severe enough to affect general health and are treated in the outpatient setting. Rare life-threatening presentations can occur that require intensive inpatient management.
