Why do we think we're so bad at maths, when we're all - almost all - born with brain circuits specialised for numbers? Our ability to use numbers has been the key from taking us from the Stone Age to the Phone Age. Trade, science and technology would be impossible without this ability. Neuroscientist Brian Butterworth argues that we are all born with brain circuits specialised for numbers.

William Stanley Jevons FRS (/ ' dʒ ε v ə n z /; 1 September 1835 - 13 August 1882) was an English economist and logician.. Irving Fisher described Jevons's book A General Mathematical Theory of Political Economy (1862) as the start of the mathematical method in economics. It made the case that economics as a science concerned with quantities is necessarily mathematical.

William Stanley Jevons - Wikipedia

In algebra, a cubic function is a function of the form $ax^3 + bx^2 + cx + d$ in which a is nonzero.. Setting $f(x) = 0$ produces a cubic equation of the form $ax^3 + bx^2 + cx + d = 0$. The solutions of this equation are called roots of the polynomial $f(x)$. If all of the coefficients a , b , c , and d of the cubic equation are real numbers, then it has at least one real root (this is true for all odd degree polynomials).

Cubic function - Wikipedia

Figure 2.1 shows an index of the average real wage (the money wage in each year, adjusted for changes in prices) of skilled craftsmen in London from 1264 to 2001, plotted together with the population of Britain over the same period. There is a long period in which living standards were trapped according to Malthusian logic, followed by a dramatic increase after 1830.

A POSTERIORI: In rhetoric, logic, and philosophy, a belief or proposition is said to be a posteriori if it can only be determined through observation (Palmer 381). In general, these are inductive arguments in which the thinker puts forth a belief or proposition as a universal rule she or he puts forth in response to an example seen in nature--the specific observed example comes first, and the ...

Honors. Graduation with Honors. No more than 16 percent of the graduating seniors, who have completed at least 72 units in the University of California will receive honors: approximately 2 percent summa cum laude, 4 percent magna cum laude, and 10 percent cum laude. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors.
