Saturated Ammonium Sulfate Solution

Sterile saturated ammonium sulfate solution can be used for selective precipitation of proteins..

Ammonium sulfate saturated solution | VWR

The saturated ammonium sulfate solution (4.32M) enables removal of abundant proteins from serum, cell culture supernatant and ascites fluid. Slowly adding the solution to a protein sample results in decreased protein solubility and eventual protein precipitation as the charged ammonium sulfate ions compete with protein for water interaction.

Pierce Saturated Ammonium Sulfate Solution - Thermo Fisher ...

Table 1. Saturated solutions of ammonium sulfate in water at several temperatures. c When preparing more concentrated solutions of $(\text{NH}_4)_2\text{SO}_4$, it is more economical and often more convenient to add the solid salt instead of a stock solution of saturated $(\text{NH}_4)_2\text{SO}_4$ (see Table 2). The weight in grams, X,...

Table 1. Saturated solutions of ammonium sulfate in water ...

The saturation concentration of an ammonium sulfate solution is temperature dependent. Lower temperatures will decrease the concentration at which the solution is saturated. A saturated solution of ammonium sulfate is 4.1 M at 25 °C, but is 3.8 M at 0 °C, the difference in molarity being 7%.

1. Prepare saturated solution of Ammonium Sulfate, for example ~550g made up to 1L distilled water. Heat gently to dissolve all the Ammonium Sulphate and let cool to working temperature on a magnetic stirrer. Crystals of ammonium sulfate should form and will tell you that the solution is fully saturated. 2.

Ammonium Sulfate Calculator from EnCor Biotechnology Inc.

A mixture of ammonia gas and water vapor is introduced into a reactor that contains a saturated solution of ammonium sulfate and about 2 to 4% of free sulfuric acid at 60 °C. Concentrated sulfuric acid is added to keep the solution acidic, and to retain its level of free acid.

Ammonium sulfate - Wikipedia

In practice, ammonium sulfate is either added directly as a solid or added as a (usually) saturated solution to precipitate desired proteins. At low salt concentrations (<0.15M) the addition of more salt in general tends to increase the solubility of proteins as ions shield the protein molecules from the charges of other molecules; this trend is termed 'salting-in'.

Ammonium Sulfate Protein Precipitation: The key to Salting-Out

Ammonium sulfate solution, 4.1M saturated at 25 °C can be purchased from Sigma-Aldrich and other suppliers.

Protein Precipitation Using Ammonium Sulfate

A saturated salt solutions is a slushy mixture based on distilled water and a chemically pure salt. Saturated salt/water solutions can be used to calibrate humidity sensors. Note that the values below may vary with several percents due to temperature variations, impurities in salt or water or slow saturation.
