In addition to the attributes obtained directly from the primary studies, a number of variables obtained from sources external to the primary studies (e.g. World Bank, 2016) were added a posteriori to the meta-sample. The rationale for including these variables is that they may help explain the heterogeneity in the observed income elasticities.

Language development is a process starting early in human life. Infants start without knowing a language, yet by 10 months, babies can distinguish speech sounds and engage in babbling. Some research has shown that the earliest learning begins in utero when the fetus starts to recognize the sounds and speech patterns of its mother's voice and differentiate them from other sounds after birth.

Depression is a common, debilitating mood disorder. Depression is highly prevalent in medically ill populations, and many persons with depression are either unaware they need professional help or are reluctant to seek it. Although contact with the primary care setting represents a potential opportunity for timely identification and intervention, abundant evidence indicates that many patients ...

Although greater diversity in law enforcement agencies is not a cure-all solution to improving police-

community relations, the Task Force did identify diversity as a key element, a necessary piece of the conversation around reform, and an important factor in evaluating the multiple causes of fragmented trust.
