Topics In Algebra 2nd Edition

Volume I of a pair of classic texts — and standard references for a generation — this book is the work of an expert algebraist who taught at Yale for two decades. Volume I covers all undergraduate topics, including groups, rings, modules, Galois theory, polynomials, linear algebra, and associative algebra. 1985 edition.

Heat Maps in R: How-To. We are living in the information age where huge amounts of data are readily available to everyone. In my book, I provide a practical hands-on approach of how to create heat maps using the free and probably most popular Statistical Software Package: R. Don't worry, I already did the hard work for you and provide all the code you'll need to create great heat maps from ...

Algebra can essentially be considered as doing computations similar to those of arithmetic but with non-numerical mathematical objects. However, until the 19th century, algebra consisted essentially of the theory of equations.For example, the fundamental theorem of algebra belongs to the theory of equations and is not, nowadays, considered as belonging to algebra (in fact, every proof must use ...
