Worksheet 7: Velocity and Acceleration

Since the velocity is constant, the displacement-time graph will always be straight, the velocity-time graph will always be horizontal, and the acceleration-time graph will always lie on the horizontal axis. When velocity is positive, the displacement-time graph should have a positive slope. When velocity is negative, the displacement-time graph should have a negative slope.

Graphs of Motion - Practice - The Physics Hypertextbook

A velocity-time graph (or speed-time graph) is a way of visually expressing a journey. With speed on the y-axis and time on the x-axis, a speed-time graph tells us how someone/something's speed has changed over a period of time.. We are going to be using velocity-time graphs to find two things, primarily: total distance, and acceleration. There are a few tools you'll need to comfortable ...
