What Is A Colloid Solution

Colloidal Solutions. A colloidal solution, sometimes known as a colloidal suspension, is a solution in which a material is evenly suspended in a liquid. In other words, a colloid is a microscopically small substance that is equally dispersed throughout another material. This graphic provides a good introduction to colloidal materials:

Colloidal Solutions - What is Colloidal?

Also called a colloid suspension, a colloid solution is the result derived from the uniform admixture of one phase, the "dispersed phase," within another, the "continuous phase." The continuous phase may be solid, liquid or gas. A colloid solution is not a true solution, since colloidal particles are generally...

What Is a Colloid Solution? - wisegeek.com

buffer solution one that resists appreciable change in its hydrogen ion concentration (pH) when acid or alkali is added to it. colloid solution (colloidal solution) imprecise term for colloid (def. 3). hyperbaric solution one having a greater specific gravity than a standard of reference.

Colloid solution | definition of colloid solution by ...

What are Colloids or Colloidal Solution? Colloidal solutions, or colloidal suspensions, are nothing but a mixture in which the substances are regularly suspended in a fluid. A colloid is a very tiny and small material that is spread out uniformly all through another substance.

What is a Colloidal Solution?: Introduction, Colloid ...

A colloidal solution, occasionally identified as a colloidal suspension, is a mixture in which the substances are regularly suspended in a fluid. A colloid is a minutely small material that is regularly spread out all through another substance. Though colloidal systems can occur in any of the three key states...

Colloidal Solution - Definition, Properties, Types with ...

Difference Between Crystalloids and Colloids. Colloidal solution is seen as a homogeneous mixture, but it can be heterogeneous as well (e.g.: milk, fog). The particles in colloidal solutions are of intermediate size (larger than molecules) compared to particles in solutions and suspensions or crystalloids.
